Subject Index of Volume 82

Aluminium
plastic instability during tensile deformation of temper-annealed non-heat-treatable aluminium alloy sheets, 46
Annealing
plastic instability during tensile deformation of temper-annealed non-heat-treatable aluminium alloy sheets, 46
Asymmetric pointed tools
cutting of ductile sheet by asymmetric pointed tools, 172
Atomic force microscope
nano-turning of single crystal silicon, 95

Blank design
blank design and strain estimates for sheet metal forming processes by a finite element inverse approach with initial guess of linear deformation, 145
Brittle materials
nano-turning of single crystal silicon, 95

Casting
steady state thermal model for the hot chamber injection system in the pressure die casting process, 27
Ceramic tiles
ASSIST: automatic system for surface inspection and sorting of tiles, 179
Chrome dye
the effect of low-temperature plasma on the chrome dyeing of wool fibre, 122
CO_2 laser
experimental study on the damage progression of an aluminium plate irradiated by CO_2 laser, 137
Color grading
ASSIST: automatic system for surface inspection and sorting of tiles, 179
Control
a proposed new speed governor, 189
Cutting forces
an analytical evaluation of the cutting forces in orthogonal cutting using a dynamic model of the shear zone with parallel boundaries, 61

Deep-drawing process
hydraulic pressure enhancement of the deep-drawing process to yield deeper cups, 156
Deformation
plastic instability during tensile deformation of temper-annealed non-heat-treatable aluminium alloy sheets, 46
Diamond turning
nano-turning of single crystal silicon, 95
Ductile sheet metal
cutting of ductile sheet by asymmetric pointed tools, 172
Dynamic modelling
an analytical evaluation of the cutting forces in orthogonal cutting using a dynamic model of the shear zone with parallel boundaries, 61

Environmentally conscious manufacturing
inclusion of environmental performance for decision making of welding processes, 78

Fine blanking tool
improved vacuum heat-treatment for fine-blanking tools from high-speed steel M2, 89
Finite element analysis
sensitivity of finite element analysis of forging to input parameters, 21
Finite element inverse approach
blank design and strain estimates for sheet metal forming processes by a finite element inverse approach with initial guess of linear deformation, 145
Forging
sensitivity of finite element analysis of forging to input parameters, 21
Fracture toughness
improved vacuum heat-treatment for fine-blanking tools from high-speed steel M2, 89
Friction welding
analysis of the friction welding process in relation to the welding of copper and steel bars, 127

Globular microstructure
microstructural characteristics of aluminum 2024 by cold working in the SIMA process, 107
Governor
a proposed new speed governor, 189
Grid for high temperature
experimental study on the damage progression of an aluminium plate irradiated by CO_2 laser, 137
Grid method
experimental study on the damage progression of an aluminium plate irradiated by CO_2 laser, 137
Guillotining
cutting of ductile sheet by asymmetric pointed tools, 172

Hardness
improved vacuum heat-treatment for fine-blanking tools from high-speed steel M2, 89
Heat flow
a study on heat flow and temperature monitoring in the laser brazing of a pin-to-plate joint, 53
Heat transfer analysis
analysis of the friction welding process in relation to the welding of copper and steel bars, 127
High speed steel M2
improved vacuum heat-treatment for fine-blanking tools from high-speed steel M2, 89
Homogenization
the effect of homogenization on the recrystallization behaviour of AA4006 Al–Si alloy, 102

Elsevier Science S.A.
PII S0924-0136(98)00259-3

Hydraulic pressure enhancement
hydraulic pressure enhancement of the deep-drawing process to yield deeper cups, 156

Injection system
steady state thermal model for the hot chamber injection system in the pressure die casting process, 27
Instability
plastic instability during tensile deformation of temper-annealed non-heat-treatable aluminium alloy sheets, 46
Integrated circuit leadframes
laser bending of leadframe materials, 117

Laser bending
laser bending of leadframe materials, 117
Laser brazing
a study on heat flow and temperature monitoring in the laser brazing of a pin-to-plate joint, 53
Linear deformation
blank design and strain estimates for sheet metal forming processes by a finite element inverse approach with initiai guess of linear deformation, 145
Long screws
rolling of long screws, 1
Low-temperature plasma
the effect of low-temperature plasma on the chrome dyeing of wool fibre, 122

Mechanical properties
analysis of the friction welding process in relation to the welding of copper and steel bars, 127
Metal cutting
an analytical evaluation of the cutting forces in orthogonal cutting using a dynamic model of the shear zone with parallel boundaries, 61
Metallurgical properties
analysis of the friction welding process in relation to the welding of copper and steel bars, 127
Micrography technique
experimental study on the damage progression of an aluminium plate irradiated by CO2 laser, 137
Microprobe analysis
analysis of the friction welding process in relation to the welding of copper and steel bars, 127
Microstructure
the effect of strong carbide-forming elements such as Mo, Ti, V and Nb on the microstructure of ferritic stainless steel, 165
Mirror surfaces
nano-turning of single crystal silicon, 95

Punch force
hydraulic pressure enhancement of the deep-drawing process to yield deeper cups, 156

Recrystallization
the effect of homogenization on the recrystallization behaviour of AA4006 Al–Si alloy, 102
Residual strain
experimental study on the damage progression of an aluminium plate irradiated by CO2 laser, 137
Rolling process
rolling of long screws, 1

Scanning electron microscope
nano-turning of single crystal silicon, 95
Semi-Solid Forging
microstructural characteristics of aluminum 2024 by cold working in the SIMA process, 107
SIMA process
microstructural characteristics of aluminum 2024 by cold working in the SIMA process, 107
Solid fraction
microstructural characteristics of aluminum 2024 by cold working in the SIMA process, 107
Stabilizing elements
the effect of strong carbide-forming elements such as Mo, Ti, V and Nb on the microstructure of ferritic stainless steel, 165
Stainless steel
the effect of strong carbide-forming elements such as Mo, Ti, V and Nb on the microstructure of ferritic stainless steel, 165
Statistical analysis
sensitivity of finite element analysis of forging to input parameters, 21
Steam turbine
a proposed new speed governor, 189
Steel alloy
laser bending of leadframe materials, 117
Surface inspection
ASSIST: automatic system for surface inspection and sorting of tiles, 179

Temperature monitoring
a study on heat flow and temperature monitoring in the laser brazing of a pin-to-plate joint, 53
Thermal
steady state thermal model for the hot chamber injection system in the pressure die casting process, 27
Tool equipment
rolling of long screws, 1

Vacuum heat treatment
improved vacuum heat-treatment for fine-blanking tools from high-speed steel M2, 89

Welding process
inclusion of environmental performance for decision making of welding processes, 78
Wool fiber
the effect of low-temperature plasma on the chrome dyeing of wool fibre, 122
